

R&I

The **ISO RESEARCH
& INNOVATION**
network

Welcome to the ISO Research & Innovation network!

This network has been created by the ISO Research and Innovation (R&I) unit with the aim of creating a community to discuss, promote and conduct research and innovation activities related to standardization.

The R&I network will also help you keep up to date with the latest news in standardization research and the activities of ISO.

Join us on
research.iso.org!

Benefits of being a member

For researchers

- Connect directly with ISO and National Standards Bodies
- Promote your work
- Discuss challenges and opportunities with interested peers
- Identify projects and ideas for future research work in standardization
- Get feedback from peers and standardization practitioners on your research work and ideas
- Give input to ISO on research priorities and issues in standardization research

Membership
is open to
anyone active in
standardization
research and/or
innovation.

For ISO members

- Connect with experts in standardization research and innovation across a range of topics
- Share and promote the work being done by your national standards body
- Give input to ISO on research priorities
- Find the information you need about standardization research products and projects
- Contribute your knowledge of standardization practice to research work and broader discussions

For others with an interest in standardization

- Access research products and discussions on topics of interest
- Connect with experts in standardization research and innovation across a range of topics
- Find opportunities for collaborative work

Membership criteria

Membership is open to anyone active in standardization research and/or innovation, and to staff of all ISO Members.

What's in the network?

When you join the network, you'll find :

- Discussions on topics related to standardization research and innovation
- News and updates about standardization research projects and publications
- Updates from the ISO/CS Research and Innovation team about ISO activities, initiatives and research priorities
- Member profiles to help you find peers, experts and other practitioners in standardization research and innovation

We encourage you to share your ideas, research publications and other content in the platform! Please note that the copyright and data protection terms for this community are different to those for other ISO activities.

You will retain any copyright you hold and sharing content in this community will not result in any transfer of intellectual property. This is detailed in the terms you will review and accept when signing in to the community. Please contact us if you have any questions.

Share
your ideas.

How to join the network

If you do not already have an ISO login :

Go to research.iso.org and fill in your details to request an account. Your request will be reviewed by the ISO R&I unit and, once approved, you will receive an email to activate your ISO login.

If you already have access to ISO electronic applications:

You will be able to login directly to the R&I network using your ISO username and password (the network uses ISO's single sign on).

About ISO

ISO (International Organization for Standardization) is an independent, non-governmental international organization with a membership of 164* national standards bodies. Through its members, it brings together experts to share knowledge and develop voluntary, consensus-based, market-relevant International Standards that support innovation and provide solutions to global challenges.

ISO has published more than 22500* International Standards and related documents covering almost every industry, from technology to food safety, to agriculture and healthcare.

For more information, please visit www.iso.org.
